

REFRIGERATING & HEATING UNITS

for gastronomy, hotel industry and retail

About us

How the past shapes the future

IDEAL AKE is a company with great tradition. We have stood for customer-orientated thinking, fresh ideas and trendsetting technology for more than 70 years. Our products and innovations are successful worldwide and have decisively shaped our industry.

The driving force behind our success is our enthusiasm – enthusiasm for technology and materials. It motivates us to design intelligent solutions for tomorrow. Always with the utmost attention to quality, durability and sustainability.

1945

Founding of IDEAL:
forerunner in the

2013–2018

Business expansion at
IDEAL and AKE

2007

New construction of the
training centre and show
room at AKE

2022

The NordCap Group, being a trusted partner for
decades, takes the majority stake of IDEAL AKE

2012

Purchase factory 2 at Gmunden,
Bundling of the strengths under one
common brand umbrella IDEAL AKE

Protecting the environment

Energy Efficiency, Eco-design and the
EC F-Gas Regulation

Natural refrigerants, energy efficiency and sustainable architecture are self-evident with us. All self-cooling devices are therefore available with the environmentally friendly refrigerant propane (R290) and thus **meet the legal requirements of the EC F-Gas regulation and eco-design directive.**

Due to a high production depth, spare parts are still available years after the purchase of a device. Instead of replacing a device completely, repair it! Sustainability at the next level!

MADE IN
AUSTRIA

Standard of quality

From the Salzkammergut all over
the world

IDEAL AKE stands for high quality cooling
and heating devices. The combination of our
employees' know-how and state-of-the-art
production technologies at the two production
sites in Bad Mitterndorf and Gmunden are the
basis for top quality.

Customer orientation

We listen actively to our customers' demands,
understand their wishes and requirements and
develop individual and innovative solutions with
them.

There is a solution for everything

Modern refrigerating and heating units fulfil far more than just their mere functional tasks. They prevail as decorative inventory, are easy to fill and operate efficiently, have failsafe technology for trouble-free operation and provide a multitude of design possibilities up to completely individual concepts.

No matter whether it is a standard or a newly developed design. In our online product catalog you will find all standard devices with the corresponding detailed information.

Cabinets & shelves

True eye-catchers for gourmets

Product presentation at the highest level. The surfaces of our refrigerated multideck cabinets can be configured in any way and fit in your gastronomic concept perfectly. From exquisite refrigerated wine cabinets to display cases for cheese – anything is possible! The implementation of a meat display case combined with a cold storage extension or in combination with a refrigerated counter for storage is only one tailor-made customer solution out of many.

Switchable & Combination display cases

Perfect all-rounder

Presenting hot and cold food in a shared display case is right in style. Many individual design possibilities such as combined bottle refrigeration in the base for impulse buying make our combination display cases into gastronomy all-rounders. Our switchable display cases provide maximum variability of use and the possibility to react perfectly to the time-of-day based demand.

Knowledge sharing

Space for inspiration and innovation at
IDEAL AKE Academy

The IDEAL AKE Academy is a place to be creatively inspired, to exchange innovative ideas, to develop new concepts and share know-how. Equipped with the latest technology and a large number of displayed IDEAL AKE devices, the academy offers the perfect place for a wide variety of trainings, (online) seminars and events.

Interspar am Schottentor

At the grand opening in Vienna of the Interspar flagship-branch at the Schottentor, nothing's been left to chance when it comes to perfect product presentation. Approximately 30 new cooling and heating devices from IDEAL AKE are being used here, all of them meeting the high demands in terms of technology, design and flexibility – letting elegance and high-tech merge seamlessly.

📍 Vienna, Austria

Handl Gastro Genusswelt

In the Handl Gastro Genusswelt (Handl Gastro World of Enjoyment) various IDEAL AKE appliances have found their places. Heated display cases, refrigerated counters and a dry ager with individual RAL finish were stylishly integrated and create a harmonious overall concept.

📍 Pians, Austria

Brut 172

The furnishing of the restaurant bridges tradition and progress. Rustic wooden beams combined with modern stainless steel technology from IDEAL AKE create a perfect ambiente. The combination of different drawers and door elements for individual use provide an efficient workflow and a superior customer service.

📍 Reijmerstok, Netherlands

Bakery Adams

The Adams Bakery exudes a friendly and welcoming atmosphere. This lightness is also reflected in the IDEAL AKE devices used there. The delicate glass construction of the display cases provides the perfect stage for food. In addition, a gentle air curtain ensures homogenous cooling.
