

AWV

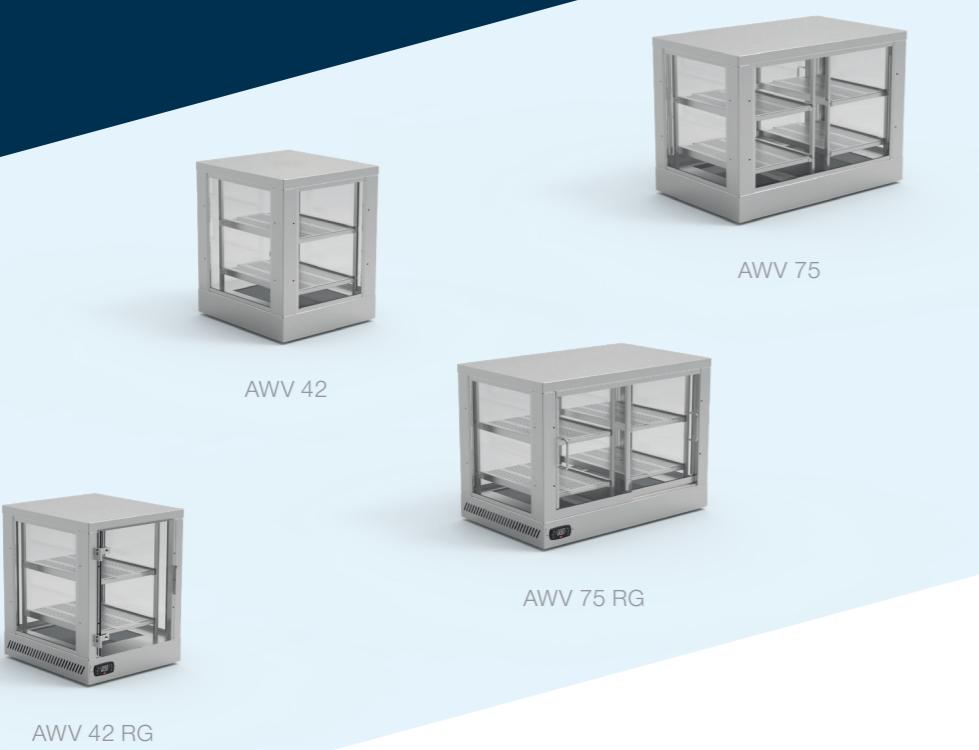

Temperature safety for hot snacks

AWV

The AWV series is distinguished by its versatile applications. Whether in checkout areas at gas stations, bistros, or in food retailing, the versatile heated display case is also suitable for back areas and intermediate storage. The slim countertop display case reliably maintains the temperature of the food, ensuring optimal freshness for the customer.

With its energy-efficient design and 3-sided insulated glazing, it not only provides optimal presentation but also stands out for its economical energy consumption.

Product supplement

The countertop refrigerated display case AKV is the visually perfect complement to the AWV. This allows for the seamless presentation of both cold and hot delicacies side by side.

Highlights

Heat-resistant and durable LED lighting at 2700K not only ensures **perfect product presentation** but also results in **lower energy consumption**

Various options such as mirrored glass doors and custom inserts provide **maximum flexibility** and **customization possibilities**

Stable, extendable intermediate shelves ensure comfortable operation and are **compatible with GN 1/2 containers**, offering maximum flexibility in product presentation

Primary heating at the bottom ensures **consistent temperature stability**

Hygienic design with a ceramic glass plate and removable shelves ensures maximum cleanliness and **easy, quick cleaning**
